ABOUT ME

Full-stack software engineer with deep experience across mobile, backend and cloud development. Specialized in Flutter, Go, Node.js and serverless AWS architectures, with a track record leading mobile app development and backend systems in production. Currently completing a master’s degree in computer and information science, applying machine learning to chemical reaction classification — a combination of software engineering and a chemical-engineering background that lets me work fluently at the intersection of the two.

Responsible, reliable, and precise, with a self-critical streak that keeps me improving, I am quick to fix my own mistakes. I focus well and follow tasks through to completion. Independent by nature, but I collaborate easily — open to input, and happy to contribute my own ideas within a team.

TECHNICAL SKILLS

	PROFICIENT	FAMILIAR
Mobile / Frontend	- Flutter - React	- React Native - Swift - Angular - Kotlin
Backend	- Go - Node.js - REST APIs	- Express - Fastify
Cloud & Databases	- AWS (Lambda, DynamoDB, Kinesis, S3, CloudFormation) - MongoDB	- Redis - Docker
Languages	- Dart - TypeScript - Go - JavaScript	- Python - C++ - C#
AI Tools	- Kiro (CLI + IDE) - OpenCode	- Codex - OpenRouter - Claude Code - Pi - OpenSpec
Other	- Git (GitHub, GitLab) - Sentry - GitHub Actions - Firebase - Codemagic - Figma	- Cypress - Stripe - Django

EXPERIENCE

- Lead Mobile Engineer** 2022–present
The NU (*originally Longevize*)
Mobile lead at an early-stage longevity startup, owning the Flutter app end-to-end and contributing heavily to the backend.
- Led end-to-end development of The NU's Flutter app, built as a customizable, multi-flavored codebase supporting multiple branded variants
 - Contributed to a backend migration from Node.js to Go and built the wearable-data ingestion backend in Go: data aggregation, processing and storage pipeline — handling 10,000+ processed messages per day
 - Maintained 90%+ test coverage across the mobile app's BLoC-based business logic and the Go wearables backend
 - Helped design the serverless AWS infrastructure, including cost-efficient DynamoDB indexing and query design
 - Set up CI/CD pipelines (Codemagic, GitHub Actions) and integrated monitoring and crash reporting (Sentry, Firebase Crashlytics/Analytics)
 - Established a spec-driven workflow with AI coding agents (Kiro, Codex, OpenCode + OpenSpec)
- Senior Software Engineer** 2020–2022
Endava Digital Solutions
Promoted to lead developer on Avant2GO — a car-sharing and car-rental platform serving 50,000+ registered users — after Endava's acquisition of Comtrade in 2020.
- Worked as a backend developer on a high-responsibility production product where reliability and responsiveness were critical
 - Owned the Node.js/MongoDB backend and integrated Stripe payments
 - Coordinated the development team — planned and assigned work, and reviewed the team's contributions
- Junior Software Engineer** 2019–2020
Comtrade d.o.o. (*later Endava*)
Started as a student developer working across web and mobile client projects.
- Built features on client web projects using React and Node.js
 - Worked with the Cypress framework on end-to-end testing for an e-commerce platform
 - Sole mobile developer (in a 3-person team) on a multi-modal route-planning app for AMZS - Evaluated Swift, Kotlin, React Native, Ionic, and Flutter before selecting Flutter for the project — my first experience with mobile development, during Flutter's transition from v1 to v2
- Cave Guard** Seasonal, 2014–2016
Postojna Cave d.d.
First work experience — seasonal student work responsible for visitor safety and assisting elderly and disabled guests; early exposure to teamwork and public-facing communication.

EDUCATION

- M.Sc. in Computer and Information Science** 2018–present
Faculty of Computer and Information Science, University of Ljubljana (final stage)
- B.Sc. in Chemical Engineering** 2014–2018
Faculty of Chemistry and Chemical Technology, University of Ljubljana
- Secondary school graduate** 2010–2014
Škofijska gimnazija Vipava

OTHER

- LANGUAGES** Slovene – native; English – professional working proficiency
- DRIVER'S LICENSE** Category B
